### lew York Stock Market

w York, June 30.—Movements of s to-day betrayed the uneasiness has felt on account of the govern'ts action against wire manucers, made known yesterday afhe close of the market. Indictof various corporation officials heen foreshadowed in reports in lation for several days, so that effect upon the market was lessified only one branch of the investion which is being carried on by government, involving the activity of the United States Steel Corpon, disturbed speculative sentiturities. The bear party, hower falled to inaugurate a movement undernt size to give the market a led impetus downward. Opinion divided as to whether impressive the worker was offered so promptly as esclede impetus downward. Opinion vas divided as to whether impressive support was offered so promptly as to discourage an extended bear raid, or whether the comparatively narrow movements of the market were due to inerits. Declines of as much as a point were recorded in only a few of the leading issues, and the strength of isolated stocks was sufficient to give the list an appearance of irregularity rather than pronounced weakness.

United States Steel lost less ground than did a number of other stocks not directly concerned in the events of the day. The attack of the bear party against this stock has been so persistent that the short interest is thought to have reached the large proportions, placing it in a strong technical position. The Harriman issues, Salida Rallway preferred, Chesa-Ohio and Kansas City the weakest of the white in the industrial ed Copper and Americaperienced setbacks, uses all developed progeth, and rose, to the of the year. Recent in Eric, including the yreport of earnings pubre in the week, and dish Canada telling of a conween a representative of md a Canadian Pacific offi-United States Steel lost less ground

ween a representative of ad a Canadian Pacific offi-ollowed by buying orders were said to be important

the weakness in Amalgatrade to-day told of increased activity. No large buying movement, however, is under way, and some price
shading has been reported during the
week. Domestic deliveries of copper
during June are estimated at well up
to 70,000,000 pounds, a figure which
foreshadows a considerable decrease
in stocks on hand as a result of the
month's operations.

A considerable loss in cash by the

month's operations.

A considerable loss in cash by the banks is indicated by known movements of currency during the week, due in large part to heavy payments to the Subtressury on account of subscriptions to Panama bond issue. Completed returns from all national banks, as submitted in response to the Comptroller's recent call, showed an increase in loans and discounts between March 7 and June 7 of nearly \$53,000,000.

Bonds were irregular. Total sales, par value, \$3,290,000. United States bonds were unchanged on call. Total sales for the day, 228,100 shares.

Review of Trade.

New York, June 20.—Bradstreet's to-morrow will say:

A quiet week in trade and industry ends a six months' period which has proved rather disappointing to the business community. Business as a whole is of a midsummer character, weather and temperature aiding retail trade in a volume about equal to a year ago, while jobbing and whole-sale trade is conservatively quiet, awaiting clearer views of crop outturn and of tariff changes.

Perhaps the most notable feature of the week has been the partial breaking of the drought in the West, which has led to a hetter tone in merchandise lines, but to little real expansion in

Ing of the drought in the West, which has led to a better tone in merchandise lines, but to little real expansion in trade. Travelers are very generally home from the road and taking vacations, with the result that business is down to midsummer limits. One of the lines at present showing a good tone is iron and steel, which reflects the effects of recent price cuts in a larger volume of business in crude and finished lines and rather more doing in the matter of output. Building is rather quiet, and lines catering thereto share therein. Coke is in better demand, and users are covering requirements for the last half of the year. Copper reflects a certain degree of irregularity. While there was rather free buying early, the general run of consumers apparently refused to follow the upward trend of the market, the impelling force of which seems to be of a speculative nature. Tin is scarce, business is dull, and prices reflect manipulation.

Business failures in the United States for the week ending June 25 were 227 against 222 last week, 191 in the last week of 1910, 213 in 1909, 236 in 1908, and 135 in 1907

R. G. Dun & Company's Report.

R. G. Dun & Company's Report.

New York, June 20.—R. G. Dun & Company's weekly review of trade tomorrow will say:

The best development of the business situation at the opening of the second half of the year is the marked improvement in the Iron and steel trade, in which there is a decided crease in confidence and a consideable expansion in actual output, in view of the important relations with this great trade bears to all the buness interests of the country, by industrial and agricultural, this provement is significant of a distitutionage for the better all around. The second half of the year opens their fore with a better outlook for a graually expanding trade activity privided the crops turn out well.

Emphasis is now given in the primary markets for dry goods to the volume of curtailment at mills; mai of the larger producers will close of a week or ten days, and the restriction of production will be formidable.
